

SPECTRO Series by Bosnor

Bosnor[®]
Solid Surface

Art, color and design at your feet

SPECTRO Series

Your fashion color, both outside and inside the shower tray.

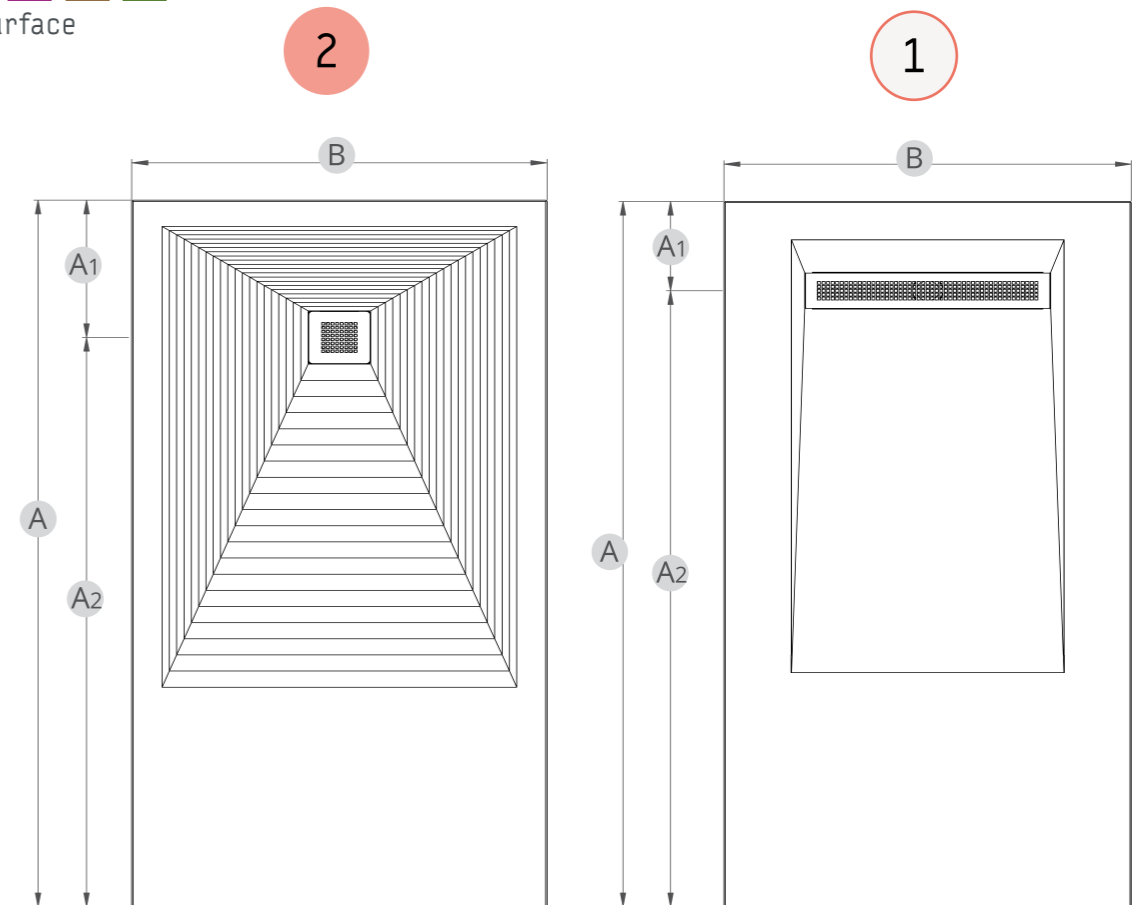

Our Step and Surface Spectro shower trays are designed to give the bathroom the colors our customers dream of. We have all the colors in the RAL chart, the equivalent of the fashionable Pantone color chart, available just for you.

Solid Syntech[®] Technology

Our trays are manufactured using our **Solid Syntech** material as a base, a **Solid Surface** material made of a high-performance polyester resin and a high-finesse and high-purity non-mineral synthetic charge called ATH (aluminium trihydroxide), resulting in shower trays that combine a pleasant touch with easy maintenance and high resistance. It should also be noted that all our trays are repairable.
